Pacific Power Source

Statement regarding RoHS Directive

Pacific Power Source, Inc. products are exempt from the requirements of "Directive 2002/95/EC of 27 January 2003 on the restriction of the use of certain hazardous substances in electrical and electronic equipment" (RoHS) per Article 2 paragraph 1. Pacific products are classified under Category 9 of Annex IB of "Directive 2002/96/EC of 27 January 2003 on waste electrical and electronic equipment" (WEEE).

The exemption is intended to allow time for Category 8 and 9 manufacturers to comply with the requirements of RoHS. While Pacific Power Source complies with 5 of the 6 required materials in the Directive, we also agree with the recommendations of ERA Report 2006-0383 "Review of Directive 2002/95/EC (RoHS) Categories 8 and 9" in that lead-free solder technology has not yet, reached the reliability and longevity that tin-lead solder gives in our product. We are monitoring developments in solder technology and will continue to review them until we find one that meets our requirements to give the customer a reliable and long lasting product in all environmental situations.
